

An exclusive report from Across The Leagues

www.AcrossTheLeagues.co.uk

Betting on Home Wins will LOSE YOU MONEY...

But these 'hidden' football bets pay out time and time again...

In this exclusive report – discover:

- > 20 reasons NOT to bet on Premier League Home Wins...
- > The real way to make money from football...
- > The bets that bookies don't want you to place...

Welcome to your exclusive free report from Across the Leagues.

Below you'll find many different ways to make money from football – but none of them will be the 'Home Win'...

The bookies love you to back short price Home Wins.

And the bookies live off punters betting blindly on their favourite teams...

Look at these Premier League score-lines:

Man Utd 1 West Ham 1

Home Win @ 1/3? LOSING BET

Arsenal 0 Middlesbrough 0

Home Win @ 1/4? LOSING BET

Man City 1 Middlesbrough 1

Home Win @ 1/5? LOSING BET

Betting like this will only LOSE. YOU. MONEY.

But there is so much **MORE** to football betting than Match Results and Home Wins...

Cash-in on these 'hidden' football markets...

In every game, for every team, in every division... whether it's the Champions League or the Championship, the Premier League or League Two...

There are bets proven to pay out MORE often than Home Wins – and make MORE money.

Just look at the Premier League last season.

Here are the Home Win records and profit/ loss figures for all 20 teams in the 2015/16 season.

For EVERY team, there was a MORE PROFITABLE 'alternative' bet in the stats markets...

Arsenal

2015/16 Home record: Won 12 Drawn 4 Lost 3

15 x 'Time of First Goal – 27th Minute or Before' @ 10/11 (1.91) = **51% ROI**

To £25 stakes = **£240.91 PROFIT**

These are the bets the bookies DON'T want you to place...

The bets above are **just 20** examples from last season in the Premier League.

Combined, from £25 stakes, the figures above show you would have made a **LOSS** of £837.82 by backing the **Home Wins**.

But by backing the **'alternative' stats-based bets**, to the same stakes, on the same teams in the same season – you would have made a **PROFIT** of **£4,345.26**.

The numbers speak for themselves. And there are profitable 'alternative' betting opportunities like this for **every team** across all leagues, every week of the season...

These truly are the bets that bookies don't want you to know about...

Forget Home Wins and the bookies' 'shop window' bets.

The key is to use the **stats**.

Or to be more accurate – to use stats that are specifically targeted at the bookies' betting markets...

The real way to make money from football...

Markets like **Goals, Corners** and **Yellow Cards** are a goldmine – if you have the right information at your fingertips.

Our Across the Leagues service does precisely that. Giving members **unique betting** stats across over **30** markets... for all **92** Premier League and Football League teams, every week... AND the Champions League...

'Innovative and invaluable'...

This really works. Across the Leagues members are making money by betting in these markets...

'...Innovative and invaluable...'

"Thank you for offering such an innovative and invaluable service in Across the Leagues"

Alex, member

'...Loads of goals – both bets came in!...'

"As you said there would be a load of goals in the CKSA game, I split my stake at over 2.5/over 3.5 - both came in easily!"

Dave L, member

'...Well done with the Both Teams to Score bets...'

"Just like to say well done in choosing the both teams to score bets this weekend (despite the bookies disagreeing with you). Thank you"

John Beck, member

'...Your programme is excellent...'

"Your programme is excellent. I have been doing the stats on every game since I joined and for me the "corners" are working out to around 80% ... and that's a bet I would never have considered until this came. Cheers"

Lui, member

'...The site is great – I used the stats to pick out a 6/1 treble...'

"Across The League site is great ... I use the site to do accumulators on over/under 2.5 goals and Both Teams to Score ... I used the Champions League stats to pick out a nice little treble – Porto Over 10 Corners, Juventus Under 2.5 Goals, Monaco Over 2.5 Goals – total odds 6/1. Keep up the good work"

Lee Blaylock, member
